RESEARCH AND VOLUNTEER EXPERIENCE

Child Psychiatry Research at Olive View Medical Center

Los Angeles, CA

Dec 2015- June 2016

Designed a project along with two of my peers to evaluate the current accessibility of child psychiatric emergency services. Both projects were poster presentations at the 2016 AACAP meeting.

Neuroscience Research at University College of London

London, UK

Research Assistant

Fall 2008

Conducted research in the laboratory of Dr. John Wattam-Bell on neural responses to local and global motion processing using visual-evoked potentials from geodesic electrode nets. Our findings showed that the V1 area of the occipital lobe is involved in local motion processing and the V5 area is involved in global motion processing.

Medical Anthropology Research in Abidiana, Brazil

Abidiana, Brazil

Bishop Scholar

June 2009

Studied the spiritual healing techniques of John of God, a well-known shaman. The research focused on the use of performance in healing and how an interaction between community, shaman, and patient can trigger a placebo effect.

Internship with Senator Barack Obama

Washington D.C.

Student Intern

Spring 2006

Interned at the Washington D.C. office of then-Senator Barack Obama for four months, full-time. Among other things, I worked on the award of a congressional gold medal to Ralph J. Bunche, founder of the UN.
